

## More than One in Three Americans Over 45 has Varicose Veins or Other Vein-related Problems. Are You One?

Besides visible varicose and spider veins, the symptoms of venous insufficiency include:

- Discomfort and pain
- Fatigue
- Skin discoloration
- Open sores
- Cramps
- Swollen ankles
- Itchy legs
- Restless legs

These veins and their symptoms never improve on their own, but they do get worse. The good news is today's treatments are so safe and easy that anyone can get relief.

Even people well into their 80s.

Whether your concerns are cosmetic or symptomatic, you should talk with a qualified vein specialist to assure an accurate diagnosis and best treatment. **At Advanced Vascular Vein Care, the consultation is quick and easy. So there's no reason not to.**

*We strive to make your care as affordable as possible. Unlike the vast majority of vein clinics in the community, we are "in-network" with most local insurance providers including, Horizon BC/BS, United HealthCare, AETNA and Medicare.*

## Are you ready to change the way you feel about your legs?

Today, there's no reason for anyone to put up with the physical or emotional discomfort caused by vein disease. Our consultation is quick and easy. The solutions are safe, effective, practically painless, and non-disruptive to your life. And unless they're purely cosmetic, the treatments are typically covered by insurance.

To minimize your out of pocket costs, unlike the vast majority of vein clinics in the community, we are "in-network" with most local insurance providers including, Horizon BC/BS, United HealthCare, AETNA and Medicare.

**Call today for your consultation: 973-540-9700. And as our patients usually tell us, you'll wish you'd done it sooner.**

## Talk to a Vein Specialist.

**Advanced Vascular Associates** offers comprehensive diagnostic and treatment services for patients with diseases of the circulatory system. We are pleased to offer specialized vein care treatments to our patients as an extension of our vascular services.

**Advanced Vascular Vein Care** takes pride in providing exceptional patient experience with a commitment to best results.

While some doctors just treat what they see on the surface, we perform a comprehensive evaluation of the deep as well as superficial leg veins. We often find the root of problems other doctors didn't detect.

### Meet Dr. Cohen, Our Medical Director.

Briefly, I received my BA at Wesleyan, my MD from Columbia, did my internship and residency at University of Michigan and my fellowship at Albert Einstein College of Medicine. I started an interventional cardiovascular practice in Paterson NJ almost 30 years ago. The pioneering work I did working inside blood vessels led to a position at NYU School of Medicine as Director of the Program in Critical Limb Ischemia. Excited by the rapidly evolving treatments for vein disease and loving to work with patients, I opened one of the first practices in NJ to focus exclusively on veins and vein therapy, where I was able to improve the quality of people's lives every day.

## How We Treat Your Veins.

You have multiple treatment options. All are performed in the office, under local anesthetic (if necessary). Afterwards, you can walk out, drive home and resume your life. Having the right people performing the right procedure for you makes all the difference.

**Endovenous Laser Treatment (EVLT):** This laser treatment is used to close the saphenous veins which cause most varicose veins. It is practically painless, takes about 30 minutes, leaves no scars, and allows for immediate recovery.

**Sclerotherapy:** Medication is injected into problem veins so they disappear. We use tiny needles which are practically painless. Sclerotherapy can be used for both medical and cosmetic treatments.

**Ambulatory Phlebectomy:** With this practically painless treatment, we can completely remove bulging varicose veins under local anesthesia and without any incisions or scars.

## What People Are Saying About Us.

*"No one can believe how amazing they look. It was that great. It was such a good experience for me."*  
– Ellen

*"Dr. Cohen is terrific. It's painless. It's quick and easy. He explains everything to you as he's going. He walks you through it."*  
– Joseph

*"Your practice and specialists came highly recommended. The medical team's years of experience were obvious on the first consultation. At that first meeting, Dr. Cohen listened to my concerns as a mother, an educator and as a triathlete...I felt that I was in the presence of strong, confident and very capable specialists."*  
– Marianne

## How We Treat You.

**This is what your experience should be and will be at Advanced Vascular Vein Care:**

First, our cheerful and knowledgeable staff will answer your questions and do what it takes to make scheduling your initial consultation easy and productive.

You aren't sitting in the waiting room for hours and once seen you won't feel rushed.

You see someone who asks all the right questions, looks beyond the obvious issues and makes a complete diagnosis, then answers your questions, clearly explaining your condition, prognosis and treatment options.

You're comfortable and confident with our staff. You know exactly what to expect at each step – no surprises.

Your benefits are verified by our team and costs less than you expected since we are "in-network" with most major insurance companies.

Your follow-up is a conversation with our treatment coordinator, who knows you and cares about your outcome.

**If you think it's time for a consultation, let us show you *The Way It Should Be*. Call 973-540-9700.**
